Description:

In introducing these 17 conference papers, chairman Mennerart explains the European framework being promoted for further development of a new generation health information system based on electronic health records. Contributors discuss specific supporting initiatives and cultural, ethical, security, and economic dimensions of such a computerized, cooperative data system. One UK health informatician presents his doubts from both professional and patient perspectives regarding the assumption that such a system will improve clinical care. Lacks a subject index. Annotation (c) Book News, Inc., Portland, OR (booknews.com)
